

Seoul, Korea.

Mr Samuel Moffett,

12 July, 1957

Dear Sam:

I am glad for the opportunity to write to you on behalf of my long esteemed friend, Kim Hyo Gun. Lenore knew him as a music student but I later learned to know him and have a special high regard for his ability and success as a farmer in Whang Hai Do.

He carefully read and followed the Farmers Life Magazine with great success. He frequently sought my help and advice and encouraged by ^{this} success in growing corn according to F.L., sold his orchard and bought a large tract of cheap marginal land in Kangwon Do. He directed his tenants so well that a great corn crop brought buyers for his land at a high price and he sold it at a profit.

He not only seeks and practices the best agr. technique but he has an eye for good opportunities. He is now trying this skill into his plans and management of his Middle School north of Kangnung school.

He not only wants to use ~~his~~ ^{that} land to help students through school but to give them a vision of better land use to take to their communities at the same time. ^{True,} Land improperly used will not only not help students thru school but it certainly has no teaching and inspiring value either. ^{But} I'm sure Kim can ~~that~~ use land as ^{both} a financial aid as a stimulus to success in life and successful industry. I'll talk about him more when I see you.

Sincerely, Doctor
